Executive summary:

Results-driven Software Engineer with expertise in Python, JavaScript, React.js, AI/ML, and full-stack development, delivering scalable and user-focused solutions. Strong in problem-solving, system development, and modern AI technologies, with a professional approach to collaboration, innovation, and continuous improvement.

Education:

Sathyabama Institute of Science & Technology, Chennai

Bachelor of Technology CSE (majoring in Software Engineering)

August 2023 – Present

CGPA: 8.05/10

Project Work:

Campus EventHub – Unified Smart Event Orchestration Platform:

- Inter-college event management lacked a centralized system, causing inefficiencies, data inconsistencies, and poor user experience.
- As a Frontend Developer, built responsive interfaces for event creation, registration, and management, implementing end-to-end workflows and REST API integration.

AI Resume Matcher:

- Recruiters faced challenges in efficiently matching candidate resumes with job requirements, resulting in time-consuming manual screening and inconsistent evaluations.
- Developed an AI-powered resume matching system using Python and NLP techniques to analyse resumes and compare them against job descriptions.

Resume Screening App:

- Traditional resume screening processes were labour-intensive and prone to inconsistencies, affecting recruitment efficiency.
- Built an automated resume screening application capable of extracting, analysing, and evaluating candidate information from uploaded resumes.

Skills:

Programming & Development: Python, JavaScript, React.js, Frontend Development, Backend Development, REST APIs

AI & Data: Machine Learning, Deep Learning, Generative AI Tools, Large Language Models (LLMs), SQL, Database Management

Core & Tools: Data Structures & Algorithms, Problem Solving, Git, GitHub

Certifications & Achievements:

Introduction to Cloud – **IBM Cognitive Class**

Machine Learning with Python – **IBM Cognitive Class**

AI & Machine Learning - **Edunet**
